## What has happened - and the future!

The company Homealarm.dk, which distributed the products HomeSecure Basic & Pro burglar alarms, has closed. I thank you for a good cooperation for many years.

Saxnet has been a dealer of Homealarm.dk's products in Eastern Denmark and has sold and installed their HomeSecure Basic & Pro models for many years. After Homealarm's closure, Saxnet has now become the new importer/distributor of this product throughout Denmark, Sweden, the Netherlands, Finland and Germany. The supply of these products is therefore secured.

Saxnet wants to sell the well-known HomeSecure products based on a basic package including 3 pcs. standard Pir and/or door window sensors. After that, the customer can choose additional sensors and equipment as needed, as well as setup in consultation with the undersigned.

Saxnet has many years of experience with the installation/setup of these quality alarms, and thus wants to continue to distribute its alarms as professionally as possible, so that you as a user are satisfied and avoid incorrect operation and false alarms as best as possible.

See more at [saxnet.dk](http://saxnet.dk) or read about the alarms [here](#)

Venlig hilsen  
Søren Jørgensen
